# IOT SOLUTIONS FROM NOBIUS

# Turn IoT Data into Business Insight

Monitored data can proactively remove issues, control inventory, and provide business with actional information to accelerate decision making

Nobius knows how to design, implement, and host monitoring solutions that integrate with IoT brokers across vendors.

With them you will keep tabs on the health of all your equipment CCTV, Heating/Aircon, Turbines, wherever you have sensors. We will centralise the monitoring of their health and performance. We focus on Open Source software that is proven, trusted and highly scalable. That produces a very cost-effective solution with no licenses to fund. Optionally we can host and manage it all for you.

Control health of your IoT Devices

Provide business insight

Predict issues before impact

Standardise across vendors

> Slash costs Remove hassle

### **NOBIUS LTD**

Our services include Proof of concept Kickstart PaaS SaaS Consulting

> info@nobius.co.uk Nobius.co.uk

#### **BUSINESS INSIGHT**

Dashboards showing IoT data tuned for technicians, operators and business staff on their mobile devices, can be custom built.

Whether the dashboards show raw sensor, filtered, correlated, or analysed data our solutions empower better decision making and raise the value of IT whilst lowering its costs.

#### Your IoT Gateway

Whatever MQTT gateway you may have or want to use, Nobius IoT solutions will integrate it.

A centralised monitoring solution will allow you to pre-process IoT data, filter, correlate it at the source.

Thus only the right signals reach IT operations.

## Gain value from IoT

Business service impact can be prevented using this data to determine impact and root cause.

Business insight brings IoT data to life, showing impact to enable faster, more accurate decisions to be made.

# Onsite or in the cloud

Our solutions can be deployed onpremise, in the cloud Azure, AWS, GCP or in ours. We'll design, implement and train your staff, or run it all for you.

### Why Nobius

Our solutions use Zabbix, the proven open source, no cost software which supports MODBUS/MQTT protocols natively.

You can learn more about our services at <u>nobius.co.uk</u> and in our introduction <u>video</u>.
